COVID-19-measures at TU Wien:
Instruction for Students

Instruction Content

General Specifications
- wash your hands regularly and thoroughly
- keep the protective distance
- pay attention to correct cough and sneeze etiquette
- avoid handshake and body contact
- gathering people in the TU buildings or TU grounds is prohibited
- staying at home in case of illness is absolutely NECESSARY

Keep the Protective Distance
The most important protective measure is keeping the distance of at least 2 m. This distance must be observed within all areas of the TU Wien.

Protective Masks
Wearing an FFP2 mask is obligatory when entering any of TU Wien buildings, corridors, elevators and during hours open to public. FFP2 masks must also be worn by all students during lectures. The FFP2 mask must be worn so that the mouth and nose are covered.
In the institute-specific workspaces, wearing the FFP2 masks is mandatory in case there is more than one person in the room and the distance of 2 m cannot be kept in offices, laboratories and workshops.

Registration and Contact Person Management
There is an obligation to register by a QR code when entering any of the TU buildings.

Prevention- and Safety Measures
As a general rule, wash your hands regularly and thoroughly with soap. This is less harmful for the skin than disinfection and provides the skin barrier necessary as protection against infection.
Directly at the entrances are disinfection points, where you can disinfect your hands immediately after entering the buildings.
Generally: Pay attention to hygiene (wash your hands regularly, avoid body contact, take care of oral hygiene)!

Risk Minimisation
Each person showing or suspecting symptoms such as cough, fever, loss of taste, etc. must stay at home and contact the health counselling number 1450 immediately.
