

# Camtasia - Nachvertonung von Vorlesungsfolien

**Goal:** Dubbing of the lecture slides

**Method:** there are 2 methods; both have advantages and disadvantages

## Table of Contents

- [Method 1: Recording via Power Point Add-In](#)
  - [Instructions](#)
- [Method 2: Recording via Camtasia](#)
  - [Instructions](#)

## Method 1: Recording via Power Point Add-In

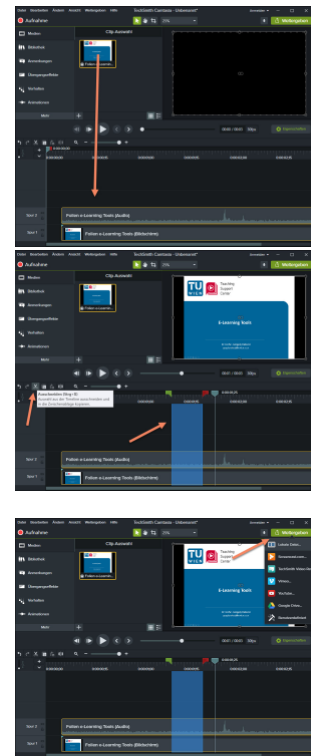

+	-
<ul style="list-style-type: none"> <li>• Recording during presentation in Powerpoint</li> <li>• Recording with camera and/or mouse cursor possible</li> </ul>	<ul style="list-style-type: none"> <li>• no single-slide recording possible</li> <li>• subsequent editing takes getting used to</li> <li>• only PowerPoint files supported</li> </ul>

## Instructions

1. Install Camtasia with default settings (PowerPoint Add-in is installed with the installation)
2. Open slide in **PowerPoint** and open tab "**Add-Ins**"
3. Start recording by pressing the **round red button** (optional: activation of the cursor or your own webcam)
4. Slide loads in full screen, **start recording** via the **control on the bottom right**
5. Lecture as usual, discuss slides one after the other
6. **Press ESC** key and click "Stop recording" in the dialog
7. Save recording file (\*.trec)
8. Normally, it is now necessary to edit the recording, so select "**Edit your recording**" and confirm with "OK"
9. Camtasia starts and the previously saved **recording appears in the Clip Window**
10. **Drag saved selection to track 1**
11. Select unnecessary **audio sequences** using the "play markers" and click on "**cut**" (scissors symbol) ([video instructions also available here](#))
12. Video is now ready, click on "**Share**" in the upper right corner and save as "Local File" with the option "Only MP4 (up to 720p)"
13. After processing, check the finished video (adapt it if necessary) and **upload it to TUpeerTube** and finally make it available to students in the TUWEL course. [Video instructions can be found here.](#)

## Screenshots of method 1

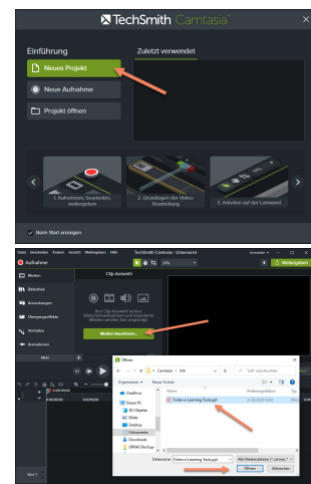

## Method 2: Recording via Camtasia

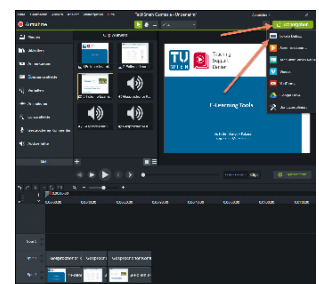

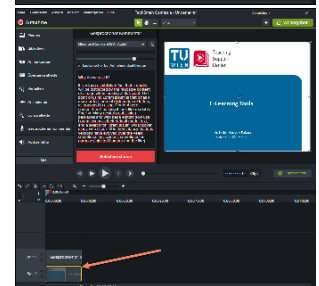

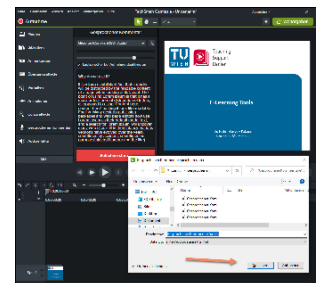

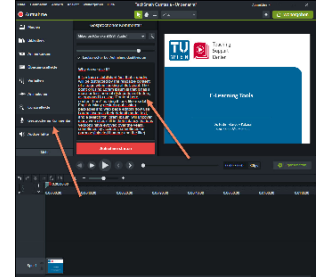

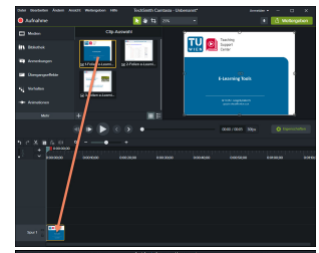

+	-
<ul style="list-style-type: none"> <li>• Single foil recording possible</li> <li>• Voice-over text easily visible for dubbing</li> <li>• Slide-based changes more easily possible</li> <li>• Besides PowerPoint, PDF files are also supported</li> </ul>	<ul style="list-style-type: none"> <li>• no integrated recording of camera and/or mouse cursor</li> <li>• rather "disruptive" recording process</li> </ul>

## Instructions

1. Install Camtasia with default settings
2. Open **Camtasia** and create a **new project**
3. Click on "**Import Media...**" and open the desired slide
4. Slides now load as individual images in the "Clip Selection" window. Now drag the **desired slide** from the "Clip Selection" **into track 1**
5. Click on "**Spoken comment**" and write / copy the desired spoken text in the designated area. Then start recording when you are ready.
6. **Stop recording** when finished and save spoken comment
7. **Adjust the length** of the slide (in track 1) to the length of the spoken comment
8. Record additional slides (as described in steps 3 to 6)
9. Video is now ready, click on "**Share**" in the upper right corner and save as "Local File" with the option "Only MP4 (up to 720p)"
10. After processing, check the finished video (adapt it if necessary) and **upload it to TUpeerTube** and finally make it available to students in the TUWEL course. [Video instructions can be found here.](#)
