

# Dokumentenkamera

<b>Description</b>	Document camera
<b>Internet-Address</b>	<a href="https://tsc.tuwien.ac.at/lecturetube/">https://tsc.tuwien.ac.at/lecturetube/</a>
<b>Type of the tool</b>	Camera in the lecture hall
<b>Costs</b>	none
<b>Accessibility</b>	

## Brief description

In lecture halls, a document camera is ready to record real objects, for example objects, experiments or handwritten elaborations on paper. In combination with [LectureTube](#) (in available lecture halls) the signal of the document camera can also be recorded.

### No rental

It is not possible to borrow document cameras. We also ask you to leave the equipment installed in the lecture halls in its proper place.

## Examples for use

- An object or document can be displayed with the beamer. It can also be shown in the recording with LectureTube.
- Replacement for black board: Instead of writing on the board - which is visible for all within the lecture hall and in the stream - you can write with a pen and paper.
- A student can present exercises to other students and the lecturer on paper. Corrections can be shown to all.
- A sample solution for an exercise including the correct approach and verbal explanations can be recorded offline and be later given to students (e. g. through [TUpeerTube](#)). Instructions and known problems can be found [here in this document \(German only\)](#).
