TUpeerTube

Description	TUpeerTube
Internet-Address	https://tube1.it.tuwien.ac.at
Type of the tool	platform for videos
Costs	provided for free by TU.it
Accessibility	

⚠ TUpeerTube is currently in a beta stage.

Brief description

TUpeerTube is a video platform of TU Wien based on the open source product PeerTube. On this platform employees of TU Wien can upload self-made (learning) videos and make them available. It works similarly to commercial services like YouTube, DailyMotion etc. The videos are hosted on a server of TU Wien.

Information for the use at TU Wien

Creating an account and setting a password

TU-employees can apply for an account free of charge at https://service.it.tuwien.ac.at/tube/ (Login with TU-account necessary)

After creating the account, a password must be set. In order to do this, you must click at https://tube1.it.tuwien.ac.at on the button "*Anmelden*", followed by clicking on the link "*Ich habe mein Passwort vergessen*".

You will receive an e-mail with the link for resetting the password. **The password is not identical to your TU-account password and should by all means be different!**

With this new password you can log in at TUpeerTube.

Uploading videos

- After logging in, just click on the **button "Upload"** ("Hochladen") at the upper right corner.
- In order to hide videos from users, you should enter "Unlisted" ("Nicht gelistet") for the **"Privacy"** ("Sichtbarkeit") setting. The link can then be given to recipients, such as students by embedding it in TUWEL.
- Tip: Similar to YouTube, you can also create series of videos in PeerTube by using **playlists** to group the playback of the videos thematically and chronologically.

Include self-made videos in your TUWEL course

- You can find istructions and tips on this page
- How-To Video - How to embed my Videos in TUWEL / Wie binde ich meine Videos in TUWEL ein (de)

Examples of use

- Upload self-produced learning videos, which can for example be be recorded with PowerPoint, SnagIt, Camtasia etc.
